

DTP Data Analytics Center (DTPDAC)

HAS BEEN RETIRED!!

Access to **DTPDAC** has been transitioned to the **MSHS Data Portal**. This application

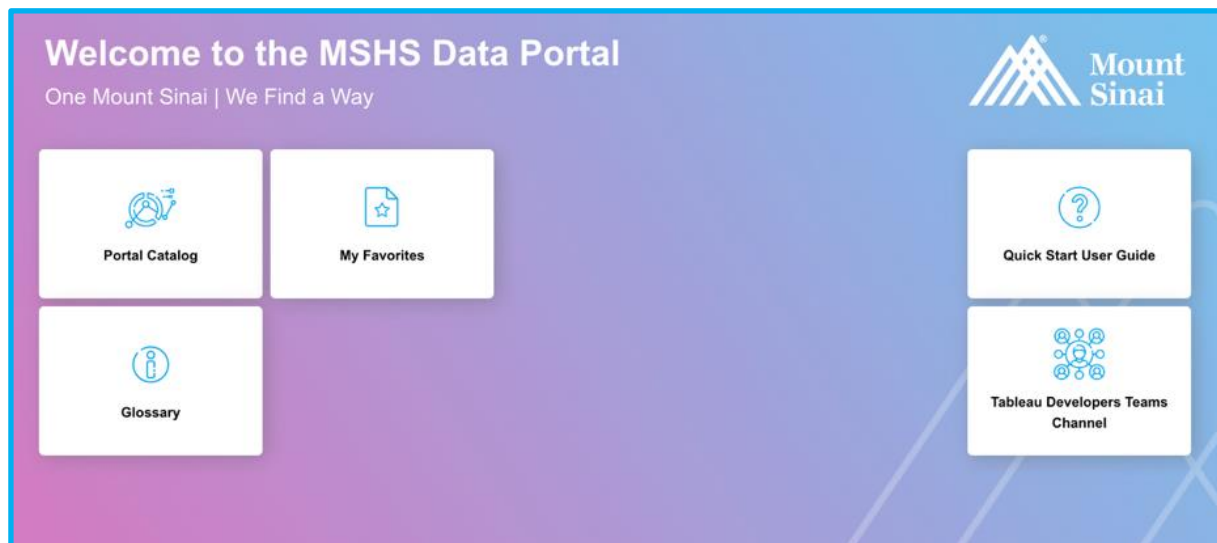

can be accessed from your desktop application launcher =>

OR by using the following link: <https://data.mountsinai.org>

The Portal uses **Single Sign-on**, so you will use your **email address and password** and 2-factor to login.

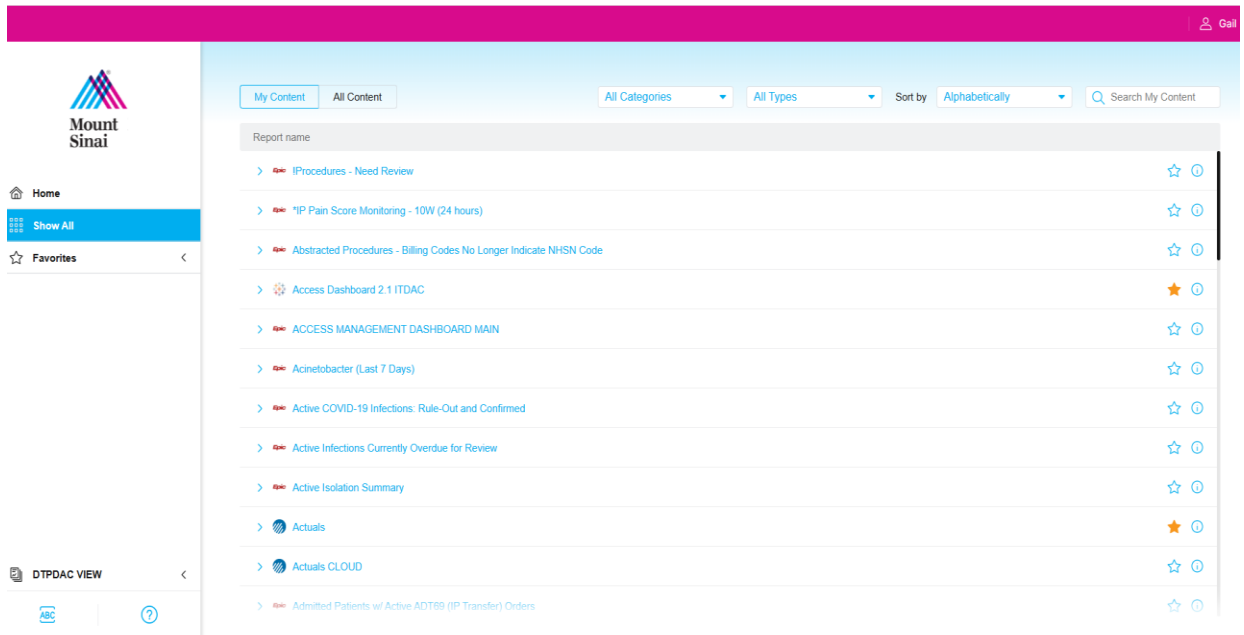

Once you login you will see the Welcome Page:

Click on the **Portal Catalog** tile and you will see the main portal page with two tabs:

My Content – this should show all the items which you can already access. Currently, the portal contains only Tableau, WebFOCUS, Epic and Crystal Reports. Each content type is displayed with a specific icon.

All Content – this should show ALL content available. Items which you do NOT have access to will display with a lock icon. Clicking the lock icon will initiate an access request in ServiceNow and provide you with a REQ ticket number.

The DTPDAC view will show you folders that correspond to your access to TILES in DTPDAC. Use this during the transition to quickly find your data assets.

A Quick Start User Guide is available on the main screen lower left corner.

A direct link to the Glossary is also available on the main screen lower left corner.

Questions or issues will be addressed via Help Desk ticket logged in ServiceNow – please route to MSHS-EDS Analytics Services.
